

# COMPANY NAME

## SITE SAFETY MANAGEMENT PLAN

Our safety management system is designed to ensure that the company meets Australian OHS legislative requirements including the provision of safe plant and equipment, safe materials and safe systems of work. This Site Safety Management Plan sets out the detail of our OHSMS. The company management in consultation with employees has developed and agreed following OHS policy to provide a framework for OHS within the company.

## Introduction

This Site Safety Management Plan has been developed to meet the requirements of the National Standard for Construction 2005.

Conformance is achieved through;

- effective safety planning, preparation and sound risk management practices based on best practice, and appropriate safe work place procedures to prevent workplace injury, and
- the provision and effective maintenance of plant and equipment
- effective management of hazardous substances and materials
- trained and competent personnel
- effective project supervision and management
- effective site induction.

Site supervisors will review and maintain employee and contractor safety awareness and supervise work practices daily to ensure all duties are performed in accordance with documented safety procedures.
