Safe Operational Use	<ul> <li>Examine the grinder/linisher to see that the tool rest is set at the required height; is within 3 mm to the face of the wheel/belt; and is securely fastened in this position</li> <li>Adjust safety glass shields on the grinder/linisher to permit clear vision of the part to be ground and still protect the operator from flying particles.</li> <li>When starting the grinder/linisher with a newly mounted wheel/belt for the first time, always stand to the side of the wheel and allow it to run for one minute before starting to grind/linish. This will guard against any injury in the event the wheel/belt is faulty and should break apart.</li> <li>Let the wheels gain maximum speed before starting to grind/linish (at least 1 minute)</li> <li>Hold the work in one hand, and steady it with the other.</li> </ul>
